Projects

EaOnline

09/2022 - Present

EaOnline is a web-based platform designed for equestrian Australia, allowing users to register themselves and their horses, track event participation, and manage rider memberships

- Designed and developed scalable, secure, and user-friendly web applications for member and horse registration processes
- Implemented state-specific requirements for horse and member registration, ensuring compliance with all relevant regulations
- Designed and managed databases to store member and horse information securely
- Conducted thorough testing of the platform to ensure functionality, security, and performance
- Worked closely with stakeholders, including state-based regulatory bodies and event organizers, to ensure the platform meets all required standards
- Troubleshoot and resolved bugs or issues reported by users, ensuring minimal downtime

Equibase

09/2022 - Present

Developed and maintained a system for registering members and horses across multiple clubs, ensuring seamless integration with club-specific requirements

- Facilitates registration of members and horses with various clubs, each with its own set of requirements and processes
- Allows members to register their horses, including detailed profiles with breed, age, and medical history
- Club-specific registration forms ensure compliance with individual club rules and guidelines
- Tracks the status of member and horse renewals, sending follow-up emails as necessary
- Secure payment processing for membership and horse registration fees
- Email templates, renewal forms, and communication strategies can be customized for each participating club
